Pewter CH010 / AR010

Winter Green CH015 / AR015

Red Rock CH020 / AR020

Mer-Ko's Color Selection Guide represents the standard colors available for our high-performance colored hardener and antique release materials. Color selections shown here represent the standard colors applied directly to Type V cement without sealer. Cement types and sealers affect the finished color in varying degrees depending upon the type of cement and type of sealer used. Request a finished sample from your applicator using the actual cement base and sealer to be used on the project.

Colors may vary from the color chart. Printed color charts are as closely representative to actual colors as modern printing technology allows. Final color selection should always be made from an actual sample. Custom colors require additional lead time; additional fees and minimum order quantities apply. Finish color can vary dramatically depending on the application method and the porosity, color and texture of the surface.
