Mer-Ko's Color Selection Guide represents the standard colors available for our Kona-Crete decorative overlays. Color selections can be customized by varying the ratio of color packs to Kona-Crete compound used. More colorant can be used to darken the color hues and less used to lighten them. This flexibility allows you unlimited design capabilities to create the color palate that complements your specific project. In addition, Mer-Ko's color packs are uniquely designed to complement ParexLahabra's stucco and EIFS finishes and ensure overall coordination of design for your project's exterior protective envelope.

Mer-Ko, ParexLahabra, Inc.
4125 E. La Palma, Suite 250
Anaheim, CA 92807

¹Production run colors may vary slightly from the color chart. Printed color charts are as closely representative to actual colors as modern printing technology allows. Final color selection should always be made from an actual sample. ²Application technique and texturing will affect the depth of color. Variations in color occur due to lighting, weather, job conditions and method of application.
