Brick Red 907

Suede 909

Mer-Ko's Color Selection Guide represents the standard colors available within our high-performance Mer-Thane topcoats. Standard, medium and heavy textures can be incorporated into Mer-Thane systems to address specific project needs or aesthetic design requirements. Custom colors are also available, offering a wide range of design capabilities. In addition, Mer-Ko's color palate is uniquely designed to complement ParexLahabra's stucco and EIFS finishes and ensure overall coordination of design for your project's exterior protective envelope.

Colors may vary from the color chart. Printed color charts are as closely representative to actual colors as modern printing technology allows. Final color selection should always be made from an actual sample. Custom colors require additional lead time; additional fees and minimum order quantities apply. Finish color can be affected depending on the application method.
